

1G Wireless Optical Module

Overview

1G optical module refers to the optical module with a transmission rate of 1. The 1G optical module is already a very mature series of products, which are favored by the majority of users since its advantages of low power consumption, small size, long transmission distance . SFP transceiver that supports 1G connections up to 3 km using single-mode fiber with a simplex LC UPC connector. Power Consumption CLASS 1 LASER PRODUCT, IEC/EN 60825-1:2014 Do not look into the ends of the fiber optic cable or SFP module while converters are. 1G SFP optical transceiver modules for multi-mode and single-mode in distances ranging from 300 meters up to 80km with a limited lifetime warranty. Whether used in data centers, enterprise networks. Cube Technology Trading's 1G transceiver series offers a diverse portfolio to meet the needs of various network applications, including SONET/SDH, xWDM, Ethernet, Metro Networks, Wireless Networks, and Transmission networks. They use advanced modulation techniques to convert electrical signals into optical.
