

72-core ODF fiber unit

Overview

The ODF Fiber Optic Distribution Frame FC/UPC-72core is a professional fiber management solution designed for medium-capacity optical networks. Please feel free to call our customer service hotline or leave us a message online. We will provide you with efficient. Fiber Management Tray also called ODF Distribution Box, Integrated Splicing and Distribution ODF. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. It acts as a distribution point for fiber-optic cables in a central office, data center, or other communication. Optical fiber distribution frame (ODF) is used for terminating and distributing central office trunk optical cables in optical fiber communication systems, and can easily realize the connection, distribution and scheduling of optical fiber lines. As the degree of network integration becomes higher.
