

72-core ODF terminal box

Overview

Fiber Management Tray also called ODF Distribution Box, Integrated Splicing and Distribution ODF. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. FIBER OPTIC TOOLS & ACCESS. Application □PC,laptop,far distance monitoring,switch,hub station. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. They are indispensable. ODF patch panels are designed to provide a high density 19" rack-mountable solution for next generation fiber networks, it is used as terminal equipment of fiber optical cable for fiber patching, fixation, splicing and management. Our ODF patch panel offers superior optical performance, high.
