

# 9000 Spectrometer

## Overview

Genius 9000 Spectrometer is a state-of-the-art analytical instrument designed for precise spectral analysis. It offers high resolution and broad wavelength range capabilities, advanced detection systems, and automated sampling for efficient and accurate measurements. Equipped with user-friendly. The Ultrospec 9000 is a dual-beam UV Visible spectrophotometer for operation in high specification laboratories. The instrument is European Pharmacopoeia compatible. Method development is supported through variable bandwidth capability and custom calculation facilities in the Datrys software. Full. Compact High-Resolution ARRAY optical emission spectrometer with an inductively coupled plasma for multi-element analyses of the highest precision equipped with a high-resolution echelle optical bench, fully PC controlled and an optional autosampler.

## Article Content

TY9000 Optical Emission Spectrometer

TY-9000 Optical Emission Spectrometers (Arc/Spark-OES) CCD-based, spark discharge, metal analyzer. Precise analysis of all common metals for incoming and outgoing product quality control.
