

APD Centralized Power Distribution Box

Overview

The APD power distribution boards (PDB) are designed for high voltage and high current applications. They consist of 8 layers of heavy copper to sustain maximum current demand whilst dissipating minimal heat, operating continuously to PCB temperatures of up to 180 °C. user-defined alarms warn IT and data center managers of potential circuit overloads to prevent accidental power loss to. Altech's power distribution (APD) system is a great way to simplify existing wiring methods. Components can be easily added or removed using quick disconnects saving valuable time and. Limited Stock Item The Hawk-Woods APD Power Distribution Adaptor provides todays sound recordist with a massive amount of available power - and all from the industry standard NP battery range. Designed as a convenient alternative to a battery box, or similar heavy duty additional power source.
