

Aggregation layer switch 16 Gigabit power

Overview

Built with a durable metal enclosure and advanced switching architecture, the Aggregation Switch supports multiple Gigabit and 10G SFP uplinks for flexible deployment. Managed models feature SNMP, VLAN, QoS, LACP, and redundant power input to ensure continuous uptime. As a 10G switch with full SFP+ ports that seamlessly integrates into the Omada Software Defined Networking (SDN) platform, SX3016F allows for remote and centralized management, anywhere, anytime. Use one of the options below to locate your desired product. Post isolation: Prevents traffic from being sent between ports 1-14, but allows ports 1-14 to send its traffic to the uplink ports 15-16. These uplink ports can also send their traffic to 1-14. It built-in power supply and 1U/19" cabinet installation. OVERVIEW The ONV33168FM is a gigabit L2+ managed Ethernet fiber switch independently developed by ONV. High-performance 10G SFP modules for optimal connectivity. The series provides enterprise-class Layer 2 and 3 switching, is designed for DNA Center and SD-Access management and automation, and includes an Enhanced Limited Lifetime Warranty (E-LLW).
