

# Are fiber optic patch cords or cables better

## Overview

The data rates achieved through patch cords are generally lower compared to fiber optic cables. How To Choose the Right One?

The correct components should be selected based on specific needs. Transmission Distance: If long distances are required, fiber optic cables are. When you build or upgrade a fiber network, the same four words pop up everywhere— fiber optic (bare fiber), pigtail, patch cord, optical cable. These connectors, commonly SC, LC, or ST types, facilitate the connection between optical devices such as transceivers, switches, and routers.
