

Benefits of On-site Training in Relay Protection

Overview

Participants gain practical experience with real-world equipment, learning to interpret complex schemes, perform critical tests, and ensure compliance with NETA standards. ABB's Digital Substation Products training and learning centers offer a wide range of training opportunities to ensure you get the most out of your digital substation product, with a special focus on Relion® protection and control relays. This expert instruction translates directly to increased system reliability, reduced downtime, and a more confident, capable. Protective relay training offers an overview of power system protection, relay schemes, digital and electromechanical relays, fault detection, coordination & practical relay settings, ideal for engineers, technicians, or electrical maintenance staff. The programme focuses on the configuration, testing, commissioning, and diagnostic. This is a comprehensive Hands-On course stressing Protective Relaying application and reliability to minimize production down time due to power outages.
