

Bhutan Anti-corrosion Operating Column Distribution Box

Overview

BXM (D) 8030 Explosion-Proof Corrosion-Resistant Distribution Box, designed for hazard zones, ensures safe power control and prevents ignition risks. The box-shaped column (also known as "box column") is a type of closed-section steel structure or steel-concrete composite component. Its core feature is the use of four steel plates (or sections) welded together to form a rectangular/square hollow box, which can be filled with concrete or equipped. DTE promotes and imports high-tech machines and construction equipment to bolster the ever-growing construction industry in the country. We value minimum downtime and maximum uptime of the machines.
