

CS rectangular connector standard

Overview

The SC (Standard Connector) uses a rectangular shell with a snap-in latch (no rotation needed). Known for easy insertion and removal, low insertion loss and high durability, it's widely deployed in FTTH, Gigabit BIDI modules interconnecting. Choose just the features you need for your application. Power Triple Lock. Our extensive product portfolio includes a broad range of industry-standard and application-specific interconnect systems, such as 28, 48, 50, 63, 95, and RAST 5 series, all designed for secure, efficient, and repeatable connections. Please select the company you'd like to login to to continue: Please contact the local sales office to request quote. Designed and optimized operators the chance to densify their existing pa er access is limited. A gang-clip can be added to four individual CS® connectors allowing them to be patched simultaneously to either adapters or 4-channel transceivers (subject FERRULE-FLANGE ITEMS).
