

Cable tray connecting plate fixing plate

Overview

Splice plates are the most widely used method for connecting cable tray sections in straight runs. We fix them with nuts and bolts through the holes in the plate and the tray sides. They offer an alternative to open wiring or electrical conduit systems and are necessary for cable management in commercial and industrial construction, as well as. A cable tray joint plate is an important part of any cable tray system. It connects two trays together and ensures a strong joint. These plates are used in industries, commercial buildings, and large projects. A reliable manufacturer always focuses. Cable tray fitting accessories, also known as cable tray accessories, are a wide range of components used to connect, support, or change the direction of mated cable trays.
