

Chilean Telecom Fiber Optic Communication Network

Overview

Chile's Undersecretary of Telecommunications (Subtel) has published statistics showing continued growth in fiber optic connections in the home. As of March 2024, fiber optics accounted for 69.7% of fixed connections, consolidating its position as the main technology in 14 regions. According to TechSci Research report, "Chile Telecom Market - By Region, Competition, Forecast and Opportunities, 2019-2029F", Chile Telecom Market was valued at USD 4.19% during the forecast period. When operational. Stretching over 4,300 kilometers from the arid Atacama Desert to the glacial fjords of Patagonia, Chile's dramatic geography presents a unique and formidable challenge for telecommunications. Yet, despite this, the South American nation has consistently punched above its weight, establishing itself. From a median download speed of 50.1 Mbps | CNEP creates a georeferenced map that visualizes fixed internet coverage and finds that 21,600 km of optical fiber is still needed to provide high-speed connectivity to all households.
