

Connector CS10

Overview

The ICU Medical CS-10 IV Access Connector with Clave is a high-quality needleless connector designed to provide safe and efficient intravenous (IV) access in hospitals, clinics, and healthcare facilities. Engineered by security experts and designed for the harsh environments common with Off-Highway performance, the CS10 is a rugged and secure wireless device for machine monitoring – local or remote. CS10 enables a CAN system with Wi-Fi and Bluetooth connectivity to a smart mobile application or PC. In Access point mode other devices connect to the CS10 device; In Station mode the CS10 device is able to connect to a wireless network providing gateway. Document purpose The main purpose of this document is to provide electrical, mechanical, and configuration details of the CS10 Wireless Gateway. With PU sheathing, non shielded cable.
