

Core Switch 52 Gigabit Optical Interface

Overview

The ONV33052FM is a gigabit managed Ethernet fiber switch independently developed by ONV. It has 4*100/1000Base-X SFP fiber ports and 48*10/100/1000Base-T adaptive RJ45 ports. Each port can support wire-speed forwarding. It can support IPV4. L2+/Lite L3 10G Multi-Gigabit Ethernet Switch The Edgecore ECS5500-12P switch is a 10G Ethernet access switch with 8 x 10GBASE-T ports and 2 x 10G SFP+/2 x 10GBASE-T as uplink ports. The switch is ideal for SMB networks as a core switch. The series provides enterprise-class Layer 2 and 3 switching, is designed for DNA Center and SD-Access management and automation, and includes an Enhanced Limited Lifetime Warranty (E-LLW). Designed for effortless multi-site network deployments with Zero Touch Provisioning, the DGS-1520. A compact 1U 400G switch built for AI clusters, storage fabrics, and high-speed aggregation, featuring four 400G QSFP56-DD ports, dual 10 Gigabit Ethernet, and RouterOS v7. With hot-swap power supplies, robust cooling, and low power consumption, it delivers ultra-high bandwidth, wire-speed.
