

# Distribution Box xfb-1

## Overview

The XFB01 facilitates communication between the NX100 robot controller and various fieldbus networks using AnyBus modules, enabling integration with automation systems. Key features include support for multiple fieldbus protocols, diagnostic capabilities, and configurable I/O. The Fuse Box is an older type of distribution panel that uses fuses instead of circuit breakers to protect electrical circuits. Each fuse is designed to blow when the current exceeds a certain limit, thereby cutting off the power to prevent damage. Available in flush and surface mounting design. Colour available as standard RAL 7035 and other colours are. Understanding Distributors to Choose the Right One Fire up your ignition system with powerful, reliable distributors! The right ignition distributor delivers powerful spark, maximum combustion efficiency, accurate timing, and rock solid high-rpm performance to your car's engine. Power comes to your home from the utility.
