

Distribution box cannot be recognized

Overview

In your on-premise Exchange Admin Center, go to Recipients / Groups and select the group you want to correct. In the Distribution list properties, make sure that the option Mail users with external email addresses is selected. There could be. Got a strange case today, a user was complaining about her cannot receive emails from a distribution list where supposed a mailbox was sent multiple emails but nothing comes in her Inbox. The mailbox shows only in Office 365. Why is this happening, and what is the solution for Office 365 mailbox not showing in Exchange Hybrid. Can you go to the management console and find the distribution group > hit properties of the group > go to mailflow settings tab > and hit properties of delivery restrictions and what is listed there?

Did you uncheck the Require Authentication box?

Did you uncheck the Require Authentication box?

I have several Dynamic Distribution Groups (with members that are listed and who receive emails) and a manager who wishes to see that list of people, but anytime anyone goes to expand/break out the list they get the following error: "Cannot perform the requested operation. When a DDG is created, a background process calculates the membership list.
