

Does fiber broadband still need a switch

Overview

Yes – it's a simple case of either contacting your provider to upgrade, or selecting a fibre broadband deal with a new provider. Please include the footer notes which will indicate if you are also in a FTTP full fibre priority area which means only FTTP full fibre is available to you and that you are in a copper stop sell are <https://landlinesgo>. It depends how you use your broadband, how happy you are with your current speeds, and whether you're ready for a small bit of disruption to get the faster line installed. If you want to keep using a landline, you'll need a digital phone service that runs over your broadband connection. Read on to learn more about the different types of fibre – including the gold standard. And, for those in remote work environments, switching to fiber internet ensures a stable connection, essential for video conferencing and large file transfers. Digital Voice will offer improved call quality and better connectivity as technology continues to advance –.
