

Dual input dual output junction box 48 pins

Overview

The JB120 extended capacity, premium fiberglass switch box is used to convert the three-conductor input wiring of up to 48 remotely installed dual-output accelerometers or piezo velocity sensors to two switched BNC's and a switched three-pin MIL spec connector for data collection. Fully featured vibration junction box with IEPE sensor condition indicator lights, and convenient interface with fold-forward panel for easy wiring. Flexible design enables a single board to be configured for 6, 8 or 12 channels. NEMA 4 rated enclosures are available in stainless steel or fiberglass. Choose from our selection of junction boxes, including over 2,800 products in a wide range of styles and sizes. VLD models feature an industry-first data ready light indicating that sensor BOV levels have stabilized, minimizing data collection time and helping ensure reliable data. For online monitoring. All product-related documents, such as certificates, declarations of conformity, etc., which were issued prior to the conversion under the name Pepperl+Fuchs GmbH or Pepperl+Fuchs AG, also apply to Pepperl+Fuchs SE. Binary multi-input/output R8D0-MIO-Ex12.
