

Emergency Centralized Power Supply for Distribution Boxes

Overview

This centralized emergency lighting power supply is suitable for fire control boxes and provides stable power for evacuation lamps. It uses smart movement and strong switch to realize automatic switching between mains/backup power, and has fault monitoring and alarm. Emergi-Lite offers an extensive and complete range of central power supply systems and has an appropriate solution for every type of building. In 2017, Suzhou Zhuwei Electrical Equipment Co. Was established in Jiangsu, China, leveraging over a decade of specialized experience in sheet metal fabrication. Designed to meet strict fire safety compliance standards, this robust unit ensures uninterrupted power. Emergency Power System: NEC Article 700 specifies electrical safety requirements for circuits and equipment that must operate to enable the evacuation of buildings where large numbers of people assemble, such as hotels, theaters, areas, and healthcare facilities. These are often referred to as Central Battery Units, Central Battery Systems, Static Inverters or Central Power Systems.
