

Fiber Optic Cable Tragedy

Overview

The deaths of four fiber broadband technicians within a short span of time—three in Cibinong, Bogor, and one in Siantar—due to electrocution are not mere incidents, but rather evidence of systemic failure in ensuring worker safety in Indonesia's telecommunications industry. In March 2024, the global communications network faced a significant threat due to the potential severing of the Red Sea undersea fiber optic cable. Fitted with a spool of barely. Finland's police confirmed on Tuesday that the damage to two fiber-optic cables running across the country's land border with Sweden was caused by excavation work rather than sabotage. In an official statement, the police said they have no ongoing criminal investigation into the recent cable break. Fiber optic FPV drones have only been used on the frontlines for roughly two years, but they have already earned a reputation. Such cases have been. These regions connect the Arctic Sea routes to global shipping lanes. The development of these sea lanes increasingly depends on situational awareness and reliable connectivity.
