

Fiber optic connector lcpc

Overview

These LC ®* /PC (Lucent Connector / Physical Contact) and LC/APC (Lucent Connector / Angled Physical Contact) connectors were developed to meet the need for smaller and easier-to-use fiber optic connectors. These connectors reduce space required on panels by 50% compared to SC/PC connectors. The Fiber Optic Patch Cords are designed to interconnect, or cross-connect fiber networks within structured cabling systems for data centers, Broadband CATV, Passive Optical Networks (PON), WDM or DWDM multiplexing, FTTH, and voice services in ATM and SONET metropolitan and access networks. "APC" stands for Angled Physical Connect. The angle of the ferrule end face is the 8-degree angle, which is very helpful for the tight connection of fiber end faces. Patch cords for.
