

Fiji Fiji Optical Transceiver Module 200G

Overview

Our 200G QSFP56 portfolio consists of transceivers which can operate over Single-Mode Fiber (SMF) or Multi-Mode Fiber (MMF), can be used for connection distances from a couple of meters up to 2 kilometers and can support up to 212.5 Gbps data rate, thus 200G Ethernet. Broadex Technologies' high performance and cost effective 200G Optical Transceiver Modules are built utilizing our innovative COB technology in a QSFP56 form factor. Designed for use in next-generation datacenters, these reliable and robust modules support high speed bit rates up to 200Gb/s over. High-Speed Optical Transceivers are designed for next-generation data centers, AI clusters, and high-bandwidth network architectures where speed, density, and reliability are critical. This category covers 200G, 400G, and 800G optical modules based on QSFP56, QSFP-DD, and OSFP form factors. QSFP-DD 200G family are new generation of 200G transceiver modules solution based on QSFP form factor.
