

Fluorescence Spectrometer for Sale

Overview

Fluorescence spectrophotometers for sale and online auction on LabX. All the major brands: PE, Hitachi, BMG, Horiba, Varian and more. The mechanisms of measurement involve a light source to excite the molecules to fluoresce and a means to isolate a specific wavelength at which to measure the light emitted. Spectrophotometers UV-Vis/Fluor are vital instruments in laboratories for measuring the absorbance and fluorescence of light in various samples, providing critical data in fields such as molecular biology, chemistry, and environmental testing. These devices are commonly used to analyze nucleic. Optical spectroscopy is a technique that analyzes how light interacts with matter to reveal the spectral characteristics of a sample.
