

Green concealed electrical box

Overview

This structure is a type of distribution transformer, designed to replace the overhead pole-mounted units used in older neighborhoods and is enclosed in a robust, tamper-resistant metal housing, often painted green or gray. From decorative covers and strategic plantings to clever camouflage techniques, there are countless ways to hide electrical boxes while maintaining easy access for utility crews. We'll walk you through practical DIY answers that won't be expensive plus professional-grade options that'll make your. One element that can often stand out in an unflattering way is the green electrical box, also known as a meter box or utility box, mounted on the side of your house. Even a well-designed and professionally installed fixture can stick out like a sore thumb. The box is most commonly identified as a pad-mounted transformer, an apparatus securely fastened to a concrete pad at ground level. But are they dangerous?

What are they called and what's their purpose?

We'll cover all this and more to help you demystify big green electrical boxes.
