

How much fireproof putty should be given for one optical distribution box

Overview

One pad per box for standard single-gang boxes. Double-gang boxes may need two pads or a larger pad to cover the full area. Check the UL listing for your assembly, as it specifies the pad size and coverage required for each box size. Was this guide helpful?

3M™ Fire Barrier Moldable Putty Stix MP+ is a one-part, re-enterable, intumescent putty that can be easily formed to firestop through penetrations and blank openings in fire-rated assemblies. Formulated dark red, this easily moldable putty stick provides up to 4 hours of fire protection. These. When protective material is used on outlet boxes on both sides of the wall as directed, the horizontal separation between outlet boxes on opposite sides of the wall may be less than 24 in. provided that the boxes are not installed back-to-back (unless otherwise indicated). Installation shall comply. Customers also searched for outlet, pad, electric, puddy or putty.
