

How to install the cover plate for a bent cable tray

Overview

Always use 2 splice plates per length of tray and SBH and CNH splice nuts and bolts to fasten them in place. EzyStrut splice bolts have a smooth head which should be installed on the inside of the tray's side wall. Proper installation not only enhances the durability of cable management systems but also ensures the safety of those working with electrical components. In this article, we will discuss key. The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. The SBH's smooth head is specially designed so it cannot damage any cables. The. But before you lay the first tray or clamp down a single cable, you need a solid plan. Mark the cable tray route based on your electrical cable tray design and site. Covers for cable trays are available without fastening material or with pre-mounted turn buckles. Covers are available for 45° and 90° bends, angle-adjustable bends, T pieces, add-on tees and cross-overs.
