

How to lay flat steel in cable tray tees

Overview

On vertical cable trays and on edgewise – horizontal cable trays, each cable shall be fixed with 20mm wide stainless steel strips (two per meter). Cable tray installation shall be self supporting type with a wide flange (48mm or 72mm or 100mm) in accordance with cable. The Cable Tray Institute is making available the current edition of this practical guide for the proper installation of aluminum or steel cable tray systems. These guidelines will be useful to engineers, contractors, and maintenance personnel. Since the jaws of the bolt cutter drags a layer of zinc across the cut end and forms a protective layer. We want each and every experience with our. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray.
