

Huawei S5700 switch optical port not working

Overview

Problem: All optical ports cannot be connected, and the indicator lights are not on.

Solution: To solve this problem, you can follow these steps: Check if the fiber and optical modules are compatible. Single-mode/multimode fibers and single-mode/multimode optical modules cannot be. (Video) Huawei Xingmai PEN Solution Installation and Deployment Video (Video) How does Huawei PEN innovate for a green and low-carbon future (Video) [Network Encyclopedia] What is MACsec (Video) [Network Encyclopedia] What Is WebMaster (Video) [Network Encyclopedia] What Is TSN (Video) [Network. This document discusses how to configure an Eth-Trunk in manual load balancing mode, how to configure an Eth-Trunk in LACP mode, and how to locate an Eth-Trunk fault. Issue 01 (2019-06-28) Copyright © Huawei Technologies Co. Perform a. By default, a combo port works in auto mode, in which the port type is determined as follows: If the optical port has no optical module installed and the electrical port has no Ethernet cable connected, the port type depends on which port is connected first. When a 1000BASE-X port uses a GE copper module, it can transmit and receive data at 10 Mbit/s, 100 Mbit/s, or 1000 Mbit/s.
