

Italian Standard for Distribution Boxes

Overview

Manufatti Caggiano is a reference for the production of approved electrical cabins for the distribution of electricity (E-Distribution). In the technical details, the Group's environmental commitment is centred on 3 guiding lines: taking on board environmental management in the running of its industrial sites, reducing the environmental impact of its products by eco-design, providing environmentally friendly solutions that contribute to energy savings. Type. Universal aluminium alloy boxes are available for aggressive atmospheres. The Palazzoli distribution boards have an IP66 degree of protection and are certified by 100 liters per minute water jet test. From the main circuit breaker, the main cables of the circuit (phase cables, ground cables, and neutral cables) start and connect directly to the differential. Wide range of surface-mounting and flush-mounting boxes for domestic ranges with high mechanical robustness and accessories supplied: dividers, junction elements, mortarguard shield, etc. Completing the range, the distribution outlet boxes for floor-mounting installations can be personalised in. An Italian electrical box (also known as a junction or outlet box) is a critical component in electrical installations, serving as a secure housing for wiring connections, switches, and outlets.
