

Login to the optical switch

Overview

You can use one of the following methods to log in to an Optical Line Terminal (OLT):

- Console port: You can log in to an OLT directly through the console port.
- Telnet: You can configure an OLT as a Telnet server.

OPTIC Switcher offers ITOM users a seamless navigation experience via OPTIC One, enabling quick transitions between various applications without the need to return to the home screen. This topic describes. The Optical Switch Setup dialog is used to enter a USB, RS-232, or LAN SICL or VISA interface address for connecting FlexDCA to an optical switch. livery of solutions fulfilling the Customers' multitude oThey are the widely used local switch console port login, the remote login by Telnet, and HTTP login through a web browser which serves as the graphic alternative to the former method with command-line. By default, the Telnet Server feature is enabled on an OLT but without an IP address.
