

# MPO Traceable Fiber Optic Patch Cord

## Overview

The MPO-MPO Patchcord for 40G/100G SR4 modules, 5m length, OM4, features 12 crossover fibers. It includes MPO type B (Cross Over) connectors with Female-Female interfaces and a 3 mm diameter. The fibers are bend-optimized with LSZH insulation, making it ideal for. Amphenol Fiber Optic Products presents an innovative solution for fiber patching. By doing so, they dramatically reduce cabling bulk, streamline deployment, and enable plug-and-play connections in high-density environments. MPO traceable fiber patch cord offers a quick and accurate method of identifying the termination point of optical patch cords. Each end of the Tracer MPO fiber patch cord features a flashing light allowing technicians to visually trace individual patch cords from one end to another without pulling. MPO MTP fiber optic patchcords ensure low insertion loss and high return loss (RL) for reliable optical transmission. Available in 8, 12, 16, 24, or 32 fiber configurations, they are compatible with various fiber types.
