

Main router connected to secondary router via fiber optic cable

Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. Check the specs, that the advertised wavelengths and desired distance/length match. Assuming you don't. It is indeed feasible to link two routers to one fiber modem and this arrangement can be advantageous, especially in cases of a multi-storeyed residence requiring more WiFi coverage or additional wired connectivity options. In the basement, there is the ONT+residential gateway device that converts the light impulses to Ethernet. Bridging two routers on one network isn't as common as it used to be (thanks to mesh Wi-Fi systems), but it can still be an effective way to improve network access in larger.
