

Price of Telecommunication Fiber Optic Cable Laying

Overview

Fiber optic cable installation costs average \$4,500 for most homeowners, with most installations ranging from \$1,500 to \$7,000. These fibers are thin strands, often as small as a human hair, that transmit data as pulses of light. With prices ranging from \$1 to over \$ 50 per linear foot, depending on the installation method. Home and business fiber optics projects typically range from a few hundred to several thousand dollars, depending on run length, fiber type, and labor needs. The main cost drivers are trench depth, fiber count and type (single-mode vs multi-mode), conduit requirements, and local permitting rules. The installation type you choose and the layout of your property determine the total labor and materials needed for your project. This guide provides realistic low, average.
