

# Removing 353nd hair glue from the pigtail fiber

## Overview

Soak the glue in a skin-safe oil, like olive oil or mineral oil, for up to an hour to loosen the glue's bonds so you can comb it out. If it won't come out, soak a cotton ball in acetone and apply it to the glue for several minutes to dissolve it. Hair glue encompasses various specialized adhesives designed for temporary or semi-permanent hair applications. Dozens of other methods have been developed but most have not been widely adopted. You can get prepolished/splice connectors you splice onto the fiber. Company Introduction:VFIBER mainly produces and processes optical fiber array, lens optical fiber, optical fiber jumper, unconventional customized industrial/medical optical fiber connection line, optical fiber chassis rack, optical fiber grinding machine optical fiber grinding fixture, optical. EPO-TEK® 353ND is a two component, high temperature epoxy designed for semiconductor, hybrid, fiber optic, and medical applications. It is one of the most popular EPO-TEK® brand products, and is known throughout the world for its performance and reliability. Reasonable pot-life that allows for low. While hair glue does an excellent job of securing wigs and other hairpieces, it can be challenging to remove it when you're ready to change your hairstyle. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a.
