

# Reusable foundation for distribution box

## Overview

They can support modular buildings up to three storeys high and a single foundation position can support up to 48kn, providing there is suitable ground-bearing capacity. Portable, re-usable pads are much more cost-effective than traditional foundations. This standard specifies minimum performance requirements and methods of testing for reusable rigid plastics transport packaging as specified in EN 13117-1. Special applications such as heavy loads, low or high operating temperatures will require an agreement to be made between the supplier and the. RADIX Ground Screws and Screw Piles are moveable and reusable, so they are ideal for all types of temporary and portable buildings or structures. Every module is designed for reuse, minimal waste, and a lifetime of possibilities. Quality engineering meets natural style, for spaces that work as beautifully as they look.
