

Router with high-strength fiber optic network cable coverage

Overview

The ASUS ROG GT-AXE16000 is built for gamers, with ultra-low latency and high throughput. Mesh systems like the Linksys Velop AX4200 are ideal for whole-home coverage . A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. 5G Ethernet port and advanced gaming features, it effortlessly handles multi-gig speeds while keeping your network secure.
