

SC optical modules can transmit 10 Gigabit Ethernet

Overview

In simple terms, 10GBASE-SR is an IEEE-standardized short-reach optical interface designed to deliver 10 Gbps Ethernet transmission over multimode fiber (MMF) using 850 nm VCSEL laser technology. SFP+ optics have become, by far, the most commonly used of all 10 gigabit-capable optics. Presents LC connectors Within these form factors are many different types of optical and electrical specifications; the only requirement is that the optics type match. The Cisco ® 10GBASE SFP+ modules (Figure 1) give you a wide variety of 10 Gigabit Ethernet connectivity options for data center, enterprise wiring closet, and service provider. FS 10GbE SFP+ module solutions provide a wide variety of 10 Gigabit Ethernet connectivity options for data centers, enterprise wiring closets, Internet Service Providers (ISPs) applications. As enterprise networks, cloud data. Our Cisco, HP and Brocade ready 10GBASE-SR Multimode SFP+ Modules feature low power consumption (<800mw) using Duplex LC OM3 fiber up to 300m (984'). If the SFP-10G-ER-1310 is connected.
