

San Marino Manufacturer LPO Optical Module 800G

Overview

800G OSFP 2xFR4 LPO: Leveraging Linear Drive technology to achieve ultra-low power consumption of 7 Watts—ideal for energy-sensitive, high-density environments such as GPU interconnect. Addressing this critical bottleneck, Global optical transceiver leader Genuine Optics proudly unveils its groundbreaking 800G OSFP 2xFR4 LPO and 800G OSFP 2xDR4 LRO optical modules, set for live demonstration at OFC 2025, where our roadmap for higher speed products will also be discussed. Both. Next-generation 400G and 800G modules for data centers, AI clusters, and telecoms — validated in a European lab, ready to ship from Europe. Designed for AI/ML applications, this advanced 800G DR8 OSFP finned top LPO module enables high-speed data transmission with ultra-low power. An LPO (Linear Pluggable Optics) solution offers considerable power savings for optical interconnect by removing the digital signal processing (DSP) function from the pluggable optical module. The module converts 8 channels of 100Gb/s (PAM4) electrical input data to 8 channels of parallel optical signals, each capable of 100Gb/s operation for an aggregate data rate of 800Gb/s.
