

Single-mode adapter with 4 LC ports

Overview

LC Female to LC Female Single Mode Quad Adapter: This type of LC adapter is used when space is limited and high density is required. The quad adapter accepts 4 LC connectors in a small footprint, providing the highest capacity. Corning closet connector housing panels (CCH-CP) are offered in a variety of fiber counts for use with LANscape® solutions hardware products for a “one-size-fits-all” approach. Used with factory-installed or field-installable connectors, these panels provide interconnect or cross-connect capability. Indoor/Outdoor FTTH Fiber Distribution Box, 4 Port Fiber Distribution Box with 4 LC Singlemode pigtails and 2 LC Duplex Singlemode adapters. 57" Singlemode fiber adapters are ideal to help plan and deploy an optical network at scale, allowing staff to find best-fit routes for cabling small server rooms and big data centers alike. Low Insertion Loss: Ensures superior optical performance and stable signal transmission. These are also known as LC fiber optic mating sleeves and are available in both single mode and multimode variants with either a zirconia sleeve or bronze sleeve. Hybrid. Designed for high-density applications, the quad LC adapter from Molex provides a 4-position LC adapter solution.
