

Standard for optical cable loss in ducts

Overview

10 describes characteristics, construction, test methods and performance criteria of optical fibre cables installed by pulling method for duct and tunnel application. It outlines the required optical fiber characteristics, referencing ITU-T and IEC standards for dimensional. When working in manholes, precautions must be taken to limit the amount of exposure to lead. Strictly observe your company's lead handling procedures to eliminate this hazard. Failure to do so may result in serious, long-term health problems. CAUTION: Care must be taken to avoid cable damage during. Recommendation ITU-T L. Product specification for duct, directly buried and lashed aerial single-mode optical fibre telecommunication cables Part 3-12 Optical fibre cables. Cable designs can also be optimized to facilitate installation.
