

# Tonga optical communication equipment

## Overview

Tonga Cable System is a submarine fiber-optic cable system connecting Tonga with Fiji, where it connects to other international networks. It is 827 kilometres (514 mi) long and was activated in 2013. It has cable landing points at Sopu, a suburb of Nuku'alofa in. Market Forecast By Component (Fiber, Transceiver, Switch, Splitters, Circulators), By Technology (SONET/SDH, WDM, CWDM, DWDM, Fiber Channel), By Application (TELECOM, Data Center, Enterprise), By Data Rate (Up To 40 GBPS, Greater Than 40 Gbps To 100 Gbps, Greater Than 100 Gbps), By Vertical (BFSI. Connectivity from the main island of Tongatapu to outer islands via microwave connectivity is improving the data speeds accessible on the outer islands, by reducing the dependency on satellite-based internet connectivity. It has cable landing points at Sopu, a suburb of Nuku'alofa in Tonga, and Suva, Fiji. While fixed line growth is reasonably static, growing by just 2% in 2015, mobile phone subscriptions increased by 16% over the same period. Revenue from mobile broadband and fixed/home broadband grew 262% in the 2015 financial year. With reliable digital connectivity vital to Tonga's economy, the AIFFP is working with partners to provide critical redundancy for Tonga's undersea cable network. We're working with the Governments of Tonga and New Zealand to build a new international undersea telecommunications cable to Tonga. The. For over four decades, Tonga Communications Corporation (TCC) has been connecting Tongans to what matters most.
