

Trough-type cable tray manufacturer processing

Overview

Most trough-type cable trays are manufactured by forming a single steel sheet through bending or roll-forming processes. Manufacturing Process Overview This one-piece construction reduces weak points and ensures uniform structural performance along the entire tray length. Whether specifying a major new project, refurbishing existing facilities or doing the engineering, procurement and construction (EPC) for your end user, with T&B Cabletray, ABB offers reliable solutions du g conforming to ASTM A123 & ISO 1461 : m. A trough type cable tray is a channel-shaped cable support system formed from a single sheet of steel. The structure resembles a trough or enclosed channel and is designed to support, protect, and organize cables, conductors, and small pipelines. Furthermore, our full line of Cable Tray Roll Forming Machines and applications is showcased on our YouTube channel.
