

UPS power supply system 48V for hospital use

Overview

Each medical UPS is UL 60601-1 tested to provide standby power in patient-care settings and comes with hospital-grade plugs and hospital-grade outlets, and a built-in isolation transformer. Maintenance-free supercaps, long-life and safe LiFePO₄ and lithium-ion battery packs, or classic lead-acid batteries are used. Our medical-grade uninterruptible power supplies deliver clean, stable power to life-support devices, diagnostic imaging, and monitoring systems—preventing equipment failure, data loss, and costly downtime. Designed for healthcare environments, our UPS solutions condition incoming power, suppress. We offer various UPS systems for medical use, with functions that meet the particular needs of these often demanding applications. Don't know your sag from your surge?

Not sure which device you need?

Learn. Below you can find a selection of our 48Vdc DC UPS solutions, offering reliable solutions to your critical systems. We appreciate that DC UPS systems always require different specifications, so if you don't find what you need, please contact us for personalised assistance.
