

What size cable should be used for an electrophoresis tank

Overview

Power cables with 4mm connectors compatible with most modern low-to-medium voltage power supplies; CE compliant Adaptors are available for complete power supply compatibility. horizontal electrophoresis system cables, electrophoresis system cables, mini electrophoresis system cables, midi electrophoresis system cables, Sign In to View Organizational & Contract Pricing. Our team of experienced scientists is. Replacement cables for destroyed and functionless cable pairs. Adaptable to all. Vertical electrophoresis cells are manufactured in different size formats to accommodate different gels sizes. Cell selection is dependent on the requirements for speed, resolution, and throughput (both number of samples and number of gels) as well as the volume of sample available (see Table. Lead cables with the colors red (anode/ positively charged electrode) and black (cathode/ negatively electrode) link the power supply to the gel box.
