

What type of cable tray does AFC use

Overview

AFC Group's FRE ® Cable Trays are designed to make it easy to manage and identify patchcords within a data rack. They are 1RU in size and, depending on type, can be mounted to the front of any FRE ® enclosure or directly to 19" rails. Width range is 50 mm to 600 mm. If requested, properly-sized ventilation holes may be drilled on heavy duty cable trays, which may be constructed in customized. There are several types of cable trays, including ladder, perforated, solid bottom, basket, and channel trays. Each cable tray type performs a different function and comes in various materials such as aluminum, galvanized steel, and FRP. If needed, special sizes can also be produced. Our specialty MC Cables include Red Fire Alarm/Control Cable ™, Parking Deck/Lot Cables ™, Home Run Cable ®, and Super Neutral. Cable tray systems are alternatives to wire ways and electrical conduit, which completely enclose cables.
