

Which category does a cable management rack belong to

Overview

A cable management rack is designed to route, protect, and organize copper and fiber cables inside network cabinets. Beyond keeping cables tidy, a well-structured cable manager reduces cable stress, improves heat dissipation, and ensures bend-radius compliance for data transmission stability. The server room cable management can be installed at the front end of the rack to provide horizontal cable management for wiring or. Cable management systems come in several types: raceways contain cables in rigid channels, horizontal managers segment connections at specific rack heights, vertical panels organize cables along the rack's length, and D-rings secure cables with minimal obstruction. These product sets can be combined to provide an optimized solution for.
