

Wiring of power distribution cabinets in UAE projects

Overview

In UAE projects, only approved cables, switches, conduits, circuit breakers and electrical panels should be used. The document provides details of an electrical installation design project for a 6-floor building in Dubai, UAE. It includes specifications for the building and flats, load calculations and schedules for distribution boards and the central chilled water system, and drawings of layouts and designs. (a) Distribution Company Earthed System (TN-S) 108 A5. These Regulations shall apply to all Customers, Property Owners, Licensed Contractors, or any other persons involved in the installation, maintenance or operation of Electrical Installations in any Premises or other place where there is an electricity supply provided by FEWA.
